United States | 908-304-1186 | dharshinavenkatesan17@gmail.com | [Portfolio](#)

SUMMARY

Motivated **Software Testing and Automation Engineer** with 2+ years of experience in Manual and Automation testing, Regression, User Acceptance Testing (UAT) and **test** management using **Application Lifecycle Management** for end-to-end test planning, execution, and defect tracking environments. Skilled in **designing and maintaining automated testing frameworks**, developing **test scripts** using Selenium and TestNG, and integrating tests within **CI/CD pipelines**. Experienced in **API testing** with Postman and SOAP, executing functional, regression, and performance test cases, and generating detailed test reports. Adept at collaborating with developers in Agile environments to ensure software quality, security, and performance standards.

EDUCATION

Illinois Institute of Technology, Chicago, Illinois, United States

Aug 2022 - May 2024

Master of Computer Science

CLUBS : Association of Computer Machinery (ACM), Women in STEM (WiSTEM), TechNews, Library Student Advisory Group

EXPERIENCE

Software Architects LLC, Software Engineer | Chicago, United States

Jan 2025 - Oct 2025

- Built and enhanced Java-based web modules using **Spring Boot** and **RESTful APIs**, ensuring efficient data exchange between frontend and backend systems.
- Developed and maintained **automated test scripts** in **Java with Selenium WebDriver and TestNG** to validate UI functionality across multiple browsers.
- Performed **UI testing** to verify layout alignment, responsiveness, and user interactions using Selenium and Chrome DevTools, ensuring a seamless front-end experience.
- Conducted **unit and integration testing** using **JUnit**, identified and fixed bugs through debugging tools, and improved overall code quality before deployment.

Accenture, Test Automation Engineer | Chennai, India

Jun 2020 - Jul 2022

- Designed and implemented **automated test frameworks in Java using Selenium WebDriver and TestNG**, enhancing test coverage, reducing execution time, and ensuring cross-browser UI validation.
- Performed functional, regression, and API testing using **Postman, SOAP UI** and validated data integrity through **SQL queries** and **XML/JSON** response verification.
- Integrated automated test suites with **CI/CD pipelines (Jenkins)** to enable continuous testing, while conducting performance testing using **JMeter** to assess system scalability.
- Collaborated with the team in **Agile sprints**, tracked and resolved defects in **JIRA**, and delivered detailed test reports and quality metrics to stakeholders for release decisions.

TECHNICAL SKILLS

- Testing Tools & Frameworks** : Selenium WebDriver, UFT, JMeter, JUnit, TestNG, SoapUI, Postman
- Testing Expertise** : Manual Testing, Automation Testing, API Testing (REST/SOAP), Functional Testing, Regression Testing, Smoke Testing, Mobile Testing, Database Testing, Usability Testing
- CI/CD & Test Management** : Jenkins, JIRA
- Testing Methodologies** : Agile (Scrum, Kanban), Waterfall, SDLC, STLC, Validation & Verification
- Databases** : MySQL, Oracle, Azure SQL
- Programming Languages** : Java, Python, SQL
- Collaboration & Productivity** : Git, Microsoft Office Suite, Visio, Slack

PROJECTS

Model-Based Testing of an Automated Retail Kiosk using EFSM

- Designed an EFSM model to represent system states and transitions for an automated retail kiosk, enabling structured and accurate test case generation.
- Developed Java-based drivers to execute model-based tests covering ghost transitions, default behaviors, and variable-based conditions. Achieved high test coverage through multiple-condition testing, transition pair validation, and a comprehensive automated test suite.

Cross-Browser Testing for e-commerce platform

- Designed and implemented automated test scripts using Selenium WebDriver and TestNG to validate the key functionalities such as employee login, leave application submission, payroll calculations, and approval workflows.
- Performed cross-browser testing on Chrome, Firefox, and Edge using Selenium Grid to ensure consistent application behavior. Captured detailed screenshots and failure logs through custom utility functions to generate test execution reports for debugging.
